Rainwater Runoff Solutions

Rain, rain ... flow away

Another year of excessive rainfall leaves many landscapes drowning in storm water. Without effective solutions, your landscape can suffer from stagnant water left behind by prolonged rain. It is our job to find those solutions. With pre-planning and creative design, there are steps we can take to mitigate the

effects of too much rain on your landscape. From regrading to underground storage, French drains or dry creeks, water gardens or bogs, we can construct attractive, effective drainage solutions that enhance your landscape and protect your investment. And because every property is unique, our team will design custom solution options around your specific needs and challenges.

What To Watch For

If you notice standing water or spongy, water-soaked soil around your garden, watch your plants for signs of stress:

- Yellow, wilting or dropping leaves
- Spongy flesh at the leaf base and/or stem
- Stunted growth or lack of flowers
- Rotting odor

Contact your Client Steward directly or call our office to have a designer assess the situation and provide you with options.

Client Steward Team

In addition to regularly scheduled maintenance, our team will be concentrating on the following services this week:

Weeding

Perennial care

Plant Health Care

This week we will be performing the following services as weather allows:

Ornamental insecticide for leaf miner

Rose care

Animal repellent

Turf fertilizer

Contact Information

Feel free to contact your Garden Steward directly with any questions or requests for service. Or contact our office 847/549-1361, Monday-Friday, 8:30am-5:00pm.

NOTE: We continue to respect physical distancing protocols for staff and client safety until further notice.
